

Brintons MMC-PRO - powerful anti-viral and anti-bacterial disinfectant for the easy treatment, removal and prevention of mould, algae and moss on hard surfaces. Also suitable for indoor use, and as a pre-paint fungicidal wash.

Application: apply to **dry** surfaces. Dilute 1:4 with water for normal use (or max 1:9 for light growths), and apply with low-pressure equipment. **Saturate** the surface and leave to dry. Do not apply if rain is expected in the next 5-6 hours. Moss : brush off heavy growth before use. Will cover an area of about 3.5m² (rough/horizontal surfaces) to 7+m² (smooth/vertical surfaces) per litre of diluted product.

Reaction Time: kills mould, moss and algae within days and then cleans the exposed surfaces in the weeks and months to come. Any residual dead growths can be lightly brushed away. Some concrete and hard surfaces may turn rusty brown in patches; this is a normal reaction and discolouration will soon dissipate.

In the event of direct contact with plants, flush with clean water. Read all precautions before use. Please visit www.brintonproducts.co.uk for further information.
