

NOMIX No-ICE

Ready-to-use de-icer solution, intended to be used directly on target surfaces using a Nomix *Total Droplet Control* applicator.

A high-quality grade Potassium Acetate de-icer, suitable for use in all situations.

HEALTH & SAFETY INFORMATION

Avoid breathing spray.

Use only outdoors or in a well-ventilated area.

Use personal protective equipment as required.

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

- Works immediately upon contact
- Safe to use on and around vehicles
- Does not cause corrosion to metal
- Does not tarnish concrete or hard surfaces
- Does not attract wildlife, unlike rock salt
- Not phytotoxic to crops unlike other salt de-icers.
- Effective down to extreme temperatures (down to -60°C)

DIRECTIONS FOR USE

Use a medium to coarse spray droplet size.

When using Nomix *Total Droplet Control* applicators, a serrated disc is recommended.

Apply Nomix No-Ice to icy areas as a curative treatment, or areas susceptible to icing as a preventative measure.

Preventative (Anti-icing):

Mild temperatures (2°C to -5°C) 1.5L/100m²

Cold temperatures (-5°C to -10°C) 2.6L/100m²

Extreme temperatures ($< -10^{\circ}\text{C}$) 3.8L/100m²

Curative

Mild temperatures (2°C to -5°C) 3.8L/100m²

Cold temperatures (-5°C to -20°C) 7.65L/100m²

Extreme temperatures ($< -20^{\circ}\text{C}$) 11.5L/100m²

Application rates are indicative only and the amount required will vary depending on the air temperature, relative humidity, thickness of ice, wind speed etc.
